## Entering the Contest

The following items must be returned in a single package marked on the outside with the student's name and school.

- Scholarship Application. Typed and complete along with a recent photo attached
- High School Transcript.
- SAT or ACT score. (a printout from CollegeBoard.com is acceptable)

As we become more dependent on technology, we are putting additional stress on our joints and muscles. It has become so prevalent, that medical providers started using the terms “Tech-Neck” or “Text-Neck” to describe the symptoms often seen as a result of poor posture or poor ergonomics when using mobile devices.

For the purpose of this contest, both “Text-Neck” and “Tech-Neck” are considered synonyms of each other.

Please write a 500-word essay answering the following questions:

1. What is “Tech-Neck”?
2. What are some of the signs and symptoms associated with this condition?
3. As you enter your first year in college, you’ll spend countless hours working on your computer or mobile device. What are some of the ways that you can prevent developing “Tech-Neck” and stay physically healthy while dealing with the stress and demand associated with college life?
4. As a future healthcare provider, how does a condition such as “Tech-Neck” affect patients in your desired field of study?  
For example: If you plan to become a dentist, how does “Tech-Neck” affect dental patients. (Apply to your own field of study)
